EDUCATION

Manipal Institute of Technology, Bengaluru

B.Tech in Computer Science & Engineering (Data Science)

- CGPA: 8.60/10

Bengaluru, Karnataka

Aug. 2024 – May 2028

St. Joseph's College

Indian School Certificate (ISC)

- Class XII: 93%

Prayagraj, Uttar Pradesh

2023

Indian Certificate of Secondary Education (ICSE)

- Class X: 95.8%

2021

PROJECTS

Sonique | *Music Identity & Compatibility Platform* [Live Demo](#)

- * **Tech Stack:** Java, Spring Boot, Spring Security, Hibernate (JPA), PostgreSQL, React, TypeScript, JWT, OAuth 2.0, Docker, Render, Spotify Web API, Last.fm API, Gemini API
- * Built and deployed a full-stack music identity platform that analyzes Spotify listening activity to generate deterministic music profiles and explainable compatibility scores between users.
- * Engineered an end-to-end data pipeline for Spotify ingestion, Last.fm artist enrichment, canonical tag normalization, user preference generation, and music identity profiling.
- * Developed a deterministic compatibility engine using hierarchical musical taste similarity and listening-style similarity to compute weighted, explainable compatibility scores.
- * Implemented JWT authentication and Spotify OAuth 2.0 with automatic token refresh, scheduled synchronization, duplicate-safe ingestion, and account lifecycle management.
- * Integrated Google Gemini as a presentation layer for natural-language compatibility explanations while keeping compatibility computation fully deterministic.
- * Containerized and deployed the Spring Boot backend with Docker on Render, React frontend on Render, and PostgreSQL on Neon; optimized JPA queries and data synchronization for efficient backend processing.

LockIn | *YouTube Focus Mode Extension*

- * **Tech Stack:** JavaScript, HTML, CSS, Chrome Extensions API
- * Developed a Chrome extension that helps users stay focused by restricting navigation to unrelated YouTube videos during active focus sessions.
- * Implemented persistent session management with pause/resume functionality, distraction tracking, and playback position preservation using Chrome Storage APIs.
- * Built browser-side navigation control mechanisms to provide a distraction-free viewing experience while maintaining seamless video playback.

TECHNICAL SKILLS

Programming Languages: Java, Python, SQL, JavaScript, C, C++ (Basics), MATLAB

Frameworks & Libraries: Spring Boot, Spring Security, Hibernate (JPA), React, Vite, Tailwind CSS

Databases: PostgreSQL, MongoDB

APIs & Authentication: REST APIs, JWT, OAuth 2.0, Spotify Web API

Developer Tools: Git, GitHub, Maven, Docker, Render, IntelliJ IDEA, Postman

Testing: JUnit 5, Mockito (Basics)

Core Computer Science: Data Structures & Algorithms, Object-Oriented Programming, Database Management Systems, Operating Systems, Computer Networks

INTERESTS

Music Production

Strength Training & Fitness

Football
